

Shanmukh Behara

Data Governance and Business Analytics

Los Angeles, CA · shanmukh.b@outlook.com · linkedin.com/in/shanmukhbehara · fromabsolutezero.github.io/My-Portfolio

SUMMARY

Data governance and business analytics professional with 8+ years across utilities, retail supply chain, food delivery and ride-hailing. Builds the validation checks, pipelines and dashboards that make operational data trustworthy enough to act on, and the analysis behind supply, inventory and risk decisions. Lean Six Sigma Black Belt, MS in Business Analytics and Operations Research, and author of a 45-chapter book on data science and machine learning. Focused on data governance, business analytics and consulting roles in utilities, supply chain and data centers.

SKILLS

Data governance	Metadata management, business glossary, KPI definitions, data validation, data lifecycle, stakeholder stewardship, access governance reporting, Erwin DT, Collibra (basic)
Languages	Python, R, SQL
Data and cloud	Azure, SAP, AWS (Redshift, Lambda, S3), SQL Server, PostgreSQL, MySQL, Hadoop, Spark
BI and reporting	Power BI, Tableau, SAS, MicroStrategy, Excel
Automation	Power Automate, Power Platform (cloud and desktop flows), SOAP and REST API integration, CI/CD
Methods	A/B testing, forecasting, regression, clustering, root cause analysis, Lean Six Sigma
Tools	JIRA, Salesforce, Amplitude, Miro, Aha!, ITSM platforms

EXPERIENCE

Southern California Edison

Los Angeles, CA

Data Governance Advisor

Jan 2024 – Present

- Implemented 22 data validation checks across SAP, Azure and Power BI, cutting monthly data defects by 42.9%.
- Designed and built a Python integration pipeline that retired a legacy orchestration layer for HR onboarding and technical provisioning, removing a major platform dependency for 4,000+ action requests a month.
- Redesigned the pipeline after a formal IT architecture review into an Azure-native service with scheduled container execution, managed secrets and a 28-test automated suite with CI/CD to resolve the review's hard-stop findings.
- Built SOAP and REST integrations with the enterprise ITSM platform that replaced the legacy request-creation flow and a SQL polling dependency, normalizing case data into SQL Server and passing a UAT proof of concept.
- Wrote the statement of work and led the architecture questionnaire for Power Platform approval, scoping Power Automate cloud and desktop flows that run the provisioning pipeline unattended each morning.
- Standardized workflow reporting for 4,000+ action requests a month, improving SLA adherence from 78% to 89% and reducing backlog by 31%.
- Built a Power BI automation-health dashboard that improved triage time by 32% through exception tracking and failure categorization, and automated follow-ups on 60,000+ line items a month, reducing manual follow-ups by 35%.
- Automated case creation for 2,000+ action requests a month through an API integration between the ITSM and process-modeling systems.
- Wrote the enhancement requirements for a Palantir Foundry migration of an ITSM incident-data pipeline from SAP HANA to SQL Server and coordinated approver sign-off; partner with the transmission and distribution information governance team on SAP metrics and dashboard reporting.

Data Analyst

Feb 2023 – Dec 2023

- Designed Power BI dashboards used to manage \$1B+ in power contracts, improving compliance by 30% and saving \$5M a year.
- Automated usage and generation data pipelines in SAS and SQL, increasing accuracy by 40% and saving \$2M a year.
- Optimized SAS scripts, reducing manual data errors by 35% and mitigating \$3M in financial risk.
- Led a Power BI and SAS training program for 15+ analysts, cutting reporting time by 30%.

Grocery Outlet

Strategy Analyst Intern

Jun 2022 – Jan 2023

- Designed a five-pillar performance scorecard (sales, business, finance, NPS and store) so each independent operator's store can be compared with its peers, using Amazon Redshift and MicroStrategy.
- Built Python models to optimize inventory, saving \$4M a year.
- Automated survey data with 1,000+ columns into structured reports, and partnered across teams to reduce delivery lead time by 15%.

Swiggy

India

Senior Business Strategy Analyst

Jun 2018 – Dec 2020

- Led 10 associates across 12 cities as operations scaled to 150,000+ orders a day.
- Drove a cloud kitchen pilot in Hyderabad end to end: mapped competitor-exclusive restaurants against order data to find areas with demand but no supply, opened cloud kitchens there, and measured the effect with a matched A/B test. Low-frequency customers ordered more, and long-distance orders fell.
- Built demand forecasting models that reduced cancellations by 20%, and reduced delivery costs by 5% through supply chain analysis.
- Built fraud and risk models, including k-means customer segmentation, that flagged chargebacks and large order cancellations early.
- Launched an A/B-tested refund verification tool, cutting refund costs by 30%.

Uber

Risk Analyst

May 2016 – Jun 2018

- Created SQL fraud-detection views that cut fraud by 15%, and classification models that flagged risky driver and customer transactions.
- Enhanced the QA program, achieving 17% month-over-month throughput gains.

Taksy Kraft Info Technologies

India

Business Strategist, founding team

- Shaped business strategy for two cab-passenger products: an in-cab tablet paid for by location-based advertising, and an app comparing nearby cabs by fare, route, surge and arrival time.

EDUCATION AND CERTIFICATION

Professional MBA, Information Technology Track, Campbellsville University

In progress

MS, Business Analytics and Operations Research, California State University. GPA 3.8, Dean's List

2021 – 2022

Lean Six Sigma Black Belt (CSSBB)

2020

PUBLICATIONS AND WRITING

- *From Absolute Zero: Data science, machine learning, and AI from no code to transformers and production*. First Edition, 2026. 45 chapters. ISBN 9798170522552.
- A Seeded-Defect Benchmark for Stage-Aware Data Validation. Working paper being prepared for the ACM Journal of Data and Information Quality.
- Your Data Validation Suite Is a Mess. Towards AI, Jul 2026.
- Delivering Trust: How Food Aggregators Uses Advanced Data Analysis Techniques to Combat Fraud. Medium, Feb 2023.
